

*Wideline presents...*  
The Paragon Range

*Wideline's premium brand of architectural windows  
and doors for style, quality, sophistication and comfort*

*Paragon: a model  
of excellence*

# Paragon<sup>®</sup>

The brand new window design  
breakthrough from Wideline

*The Wideline range is already one of the best known, and most trusted in Australia*

“Now we are proud to announce the new generation of Wideline windows – the supremely elegant Paragon range: a unique combination of stylish design and sound practical benefits.

As with all Wideline products, the Paragon range of windows and doors is:

- Unmatched in quality of design, manufacture and craftsmanship – using the most advanced technologies and production techniques available
- Designed for architectural systems to suit every window and door need
- Made from specially selected, highest quality materials
- Subject to stringent quality control at every stage of manufacture
- The result of our research and development team working in conjunction with the *National Association of Testing Authorities (NATA)* to ensure our products exceed the standards of relevant Australian building authorities
- Fully Australian designed and manufactured
- Fully supported by our 10-year written guarantee to provide complete satisfaction and peace of mind

Being one of Australia's largest privately owned manufacturers of timber and aluminium framed windows and doors, we are totally committed to meeting the high quality requirements of home owners and renovators.

With over 35 years in business, we take great pride in the products we make – to ensure unsurpassed quality and value for money along with the total satisfaction that comes from dealing with an Australian-owned business that has a long and proven track record.

***Leading the way in style, quality  
and versatility for beauty that lasts***

### ***...the solution is Paragon***

Paragon windows and doors are modular, functional, versatile and aesthetically ideal for the wide variety of settings found in new home designs.

Our designers are especially mindful of the increasing need to conserve energy and offer variations that help control room temperature, minimise penetration of damaging UV rays and solar heat.

At the forefront of such advances, the new Paragon range is energy rated through the *Australian Window Association's Window Energy Rating Scheme (WERS)*.

The heart of the Paragon system is its stylish, innovative 100mm x 40mm main frame; this enables the entire range to offer a wide range of flexible glazing options – from performance glass to double glazing.

The entire range (excluding louvres) can be glazed with glass up to 24mm thick or can be individually colonial glazed.

### ***Invite the great outdoors inside!***

Doors up to three metres high can be created with specially designed Paragon panels. Bi-fold, Hinged, Sliding and Stacker Door panels are all manufactured with matching aluminium extrusions to give a uniform look to suit the discerning buyer.

Views can be further maximised with large Paragon awning or casement windows; these come complete with quality hardware and double compression seals.

Windows can be readily combined with fixlites, louvres and other Paragon products to give the desired finish.

The result is a supremely elegant look only possible with integrated components designed to work together in meeting your need for quality and comfort.

On the purely practical side, the Paragon range offers unmatched acoustic and sound control, accommodates extreme weather, bushfire conditions while meeting energy and climate concerns.

We look forward to working with you to create a finish and style for your home that suits with the use of Paragon."

*Michelle Logan, Marketing Manager*

# Awning/Casement Windows

*The Paragon awning/casement range creates great design flexibility and aesthetic appeal, providing the ability to incorporate large elegant windows*

Being constructed within single vertical frames, awning windows are hinged at the top; and casement windows are hinged at one side, they bring you panoramic views, are easy to operate and provide conveniently controlled ventilation.

The robust but elegant external frames offer strength in exposed areas such as buildings higher than 10 metres or those in cyclonic areas. They are fitted with full-perimeter sash seals for maximum weather protection while reducing air infiltration.

For improved security, Paragon awning/casement windows come with an efficient locking system and can be readily fitted with matching Paragon insect screens.

We will be happy to advise you on the glass options and hinging methods that will best suit your home and your special requirements.

# Louvre Windows

*Enjoy a beautiful uninterrupted view and plenty of natural light with convenient weather control and the freedom to let in the amount of fresh air you prefer. It's so easy with Paragon louver windows*

You have the option of choosing from glass, western red cedar or extruded aluminium blades which are encased in a sturdy aluminium surround.

The louver blades are secured by unique injection-moulded clips that are silent, provide a weathertight seal and are corrosion-free.

In many instances the louver mechanisms can be colour matched to your chosen aluminium frame finish. Ask us about our wide variety of colour schemes.

Paragon louvres can be fitted with integrated external insect screens that do not interfere with the operation of the louver blades.

You can have Paragon louver frame retrofitted on site to existing Paragon fixlite frames of suitable width if you require greater ventilation than available at present.

# Hinged Doors

---

*You (and your visitors) will be impressed by the way Paragon Hinged Doors create a welcoming and elegant entry to your home*

Paragon Hinged Doors are available in inward and outward opening configurations and come in single and double opening door frames.

The whole range can be readily customised to include overhead highlite and sidelite panels of clear, louvred, coloured, textured or custom glass to perfectly match your home décor.

The inclusion of high quality full perimeter seals around the door frame provides superior weather protection and greatly minimises air infiltration – an important consideration for air-conditioned homes.

## Sliding Doors

*You'll find Paragon sliding doors are the perfect choice when you want a high performance door with clean, modern lines*

Constructed around a stylish continuous outer frame, they match perfectly with our elegant but unobtrusive insect screens.

Offering convenient entry and generous ventilation, they are ideal next to your patio, deck or garden. They come with self-draining sills and effective seals to prevent water entry.

Toughened glass, finished with a safety motif, is fitted as standard; they can also be double glazed to insulate against temperature and noise.

The aluminium construction, available in 2, 3 and 4 door panel configurations, are manufactured for easy maintenance and durability. These doors are smooth and quiet in operation.

# Sliding Stacker Doors

## *Their handsome, modern design brings you a new standard in large sliding doors*

They are available in 3 and 6 panel configurations to provide an excellent design solution for large screenable openings.

The three-panel version has two sliding panels which slide neatly behind the third; the six-panel configuration has four sliding panels with two sliding left and two sliding right.

These high performance units, 300Pa water rated, are constructed around a robust heavy duty 150mm deep outer frame. The addition of an outer flydoor frame gives an overall depth of 207mm from inside to out.

Individually glazed colonial bar arrangements and on-site glazing options are also available.

The outer frame's design matches the Paragon sliding door range, giving an aesthetic advantage and ease of installation for jobs using both suites.

## Bi-fold Doors

---

*Paragon bi-fold doors enable indoor and outdoor areas to come together to maximise floor space for entertainment or relaxation*

They take our already highly successful design to another level. Their heavy duty stainless steel carriage systems maximise panel sizes and provide smooth and easy operation.

Available in both open-in and open-out configurations with panel widths up to 1100mm, they offer you an exciting selection of design and performance options.

For weather protection, these doors feature full perimeter seals and double door stile seals.

Individually glazed colonial bar arrangements and on-site glazing are also available. Please ask your Paragon consultant for further details.

# Matching accessories and fittings

## *The Paragon range comes with a comprehensive range of stylish accessories to offer additional safety and protection*

All are specifically designed to enhance the way that Paragon will compliment the décor of your home.

Paragon windows can be beautifully customised with colonial or federation bars and can also be fitted with custom-designed and manufactured insect and safety screens. Being manufactured to the same high standards, they match and fit perfectly.

## *Choose Paragon for a beautiful result and perfect peace of mind*

All Paragon windows, doors and accessories are designed and manufactured to the highest standards by Wwiline, an Australian owned and operated company whose outstanding reputation is based on over 35 years of leadership in local manufacturing and meeting the needs of our clients.

All Paragon products are manufactured in Australia using the very latest techniques, technology and material which are rigorously tested for quality.

All are backed by our comprehensive 10-year warranty.

# Safety & technical guide

## Working safely with Paragon windows and doors

Please note that, due to their size and weight, many Paragon items will need to be site glazed. Lifting and carrying the items with appropriate care will need to be taken. Maximum permissible weight limits for lifting by our factory staff and drivers are 20kg for one person and 70kg for two. This would apply in principle to builders and tradespeople on site; we recommend you receive advice from the appropriate qualified consultants or authorities to ensure compliance and worker safety.

# Wideline's extensive colour range

*Colours are unlimited when it comes to Wideline*

Many popular colours in powdercoat finish or anodising are available. All are good looking, long-lasting performers for any location. Should you not find the exact colour you're after, we'll match that special colour by bringing it to life. Just ask one of our sales professionals.

Paragon Suite	Max Glazing Mm	Open In/ Open Out	Max Individual Frame Size	Min Individual Frame Size	Recommended Max Panel Width	Screens
Awning	24 (6/12/6)	Out	2100 X 1200	450 x 510	2100	Yes

All products (apart from louvres) can be individually glazed with colonial bars

## We are proud members of the Australian Window Association

Wideline, designer and manufacturer of the Paragon range, is a founding member of the Australian Window Association (AWA). The Association was established to ensure that manufacturers produced windows that meet and preferably exceed stringent safety and structural standards. From material selection and workmanship quality to weather sealing and applied finishes, all aspects of production are scrutinised to ensure they meet the relevant Australian standards. The AWA label on every Wideline product means you can be confident our vast range has been tested, certified and guaranteed by independent inspectors accredited by the National Association of Testing Authorities (NATA).
